CERTIFIED QUALITY, TURN-KEY PRODUCT: THE STRENGTH OF A TEAM IN THE FIELD OF METAL-WORK CONSTRUCTIONS

From design to assembling, Team Tecnocarp provides customers with a whole set of competences and experience to supply the **finished product**.

MECHANICAL ENGINEERING DESIGN CML INNOVATION *You need it, We fulfil it*

CML Innovation cooperates with customers to design new solutions for automation and production, with a focus on safety norms. We offer thermal, structural and vibrational analysis thanks to our FEM systems. The new premises have specific tools and a 1000mq production area to assemble complete and complex systems.

THE REFERENCE FOR MEDIUM-HEAVY METALWORK TECNOCARP *The one and only reference for your metalwork structures*

Medium-heavy steel metalwork and machining are the beating heart of our Team's activity, led by TECNOCARP. Thanks to its long-term experience, Tecnocarp can manage all phases of production, standing as the only point of reference for customers. Since 1973, thanks to great experience and innovation, Tecnocarp has been producing complex structures up to 30 ton.

TECNOCARP is certified
ISO 9001
UNI ISO 3834-2
EN 15085-2
EN 1090-2+A1

BORING AND MILLING

ARES

Traditional heart, industrial production

ARES owns a machine fleet like few others in Italy, allowing the machining of very long pieces with the maximum precision. Soralue FR14, the biggest machine, has 2 opposite travelling columns which can work independently and a stolle working table of 3x16 m. to mill and bore pieces up to 14 x 4.2 x1.6 m3 and 32 ton.

WELDING AND PLATE ROLLING

CIPRIND

Fitting genius

Thanks to its specialised staff, CIPRIND supplies truncated-cone rolling, fitting completion, submerged arc welding, barred tees and NDT controls.

The unique cold-plate rolling machine, especially designed for our use, can process plates up to 50 mm thickness and 1,550 mm width with a force of 350 ton.

THE TEAM'S EUROPEAN STRENGTH

BAMU

Italian talent, German quality, Slovakian production

Design, medium-heavy metalwork, welding, thermal treatments, machining, assembling and delivery:

Team Tecnocarp's whole service is available in Europe with BAMU. Thanks to the overhead cranes up to 40 tons and a milling and boring TOS centre with a working area of 5 x 3 x 2.2 m and a stolle turning table of 17.5 ton, Bamu can carry out the whole production in just one plant.

CIPRIND

Fitting genius

Since 2014, Ciprind soon began playing a leading role in the steel manufacturing industry.

Thanks to an extraordinary trained staff, CIPRIND offers truncated-cone rolling, fitting, submerged arc welding, barred tees and non-destructive tests.

AN EXCLUSIVE PRODUCTION

Ciprind invests in technology and machinery to give the best service: the plate rolling machine is really one of a kind, as it was especially designed for our use

SPECIALISED, WITH PASSION

People first: our extraordinarily trained staff is able to put skills and professionalism, but also great passion and tenacity at the company's service

YOUR ONE AND ONLY REFERENCE

Being part of Team Tecnocarp, Ciprind stands as the only point of reference for customers, granting a turn-key service.

The unique cold-plate rolling machine, especially designed for our use, can process plates up to 50 mm thickness and 1,550 mm width with a force of 350 ton.

"Seeing steel in the form of simple plates that become cones, perfectly round tubes, fittings or metalwork structures fills us with satisfaction and prompts us to set ourselves new goals."

TESTING DEPARTMENT

Not only dimensional tests: in the testing department, Ciprind carries out upon request many NDT tests, i.g.: ultrasound, magnetic and penetrant testing. The testing staff have 2nd level certifications, according to: UNI EN ISO 9712 and ASNT-SNT-TC-1A.
